

Establishing the Common Agenda

Implementing the Infrastructure

Sustaining and Renewing

ANALYSIS

OPEN THINKING

Articulating the Goal

Clarity on preliminary shared goals provides the framework to engage other stakeholders.

Identifying the Stakeholders

Intentionally considering diverse perspectives identifies the breadth of system stakeholders.

Building System Knowledge

Research into current systems clarifies the need and informs ideas for sustainable change.

Finalizing the Common Agenda

Refining the common agenda sets the guiding priorities for collective action.

Establishing the Infrastructure

Defining governance and operational processes builds the platform for the organizational backbone.

Convening Work Groups

Priority-focused work groups drive ongoing alignment of individual and collective actions.

Developing Plans for Action

Creating plans and metrics guides the work groups into action and builds momentum.

Guiding the Collective

Backbone support and monitoring optimizes work group performance and tracks action effectiveness.

Learning and Adapting

Periodic evaluation leverages collective learning to refine the common agenda and adjust priorities and actions.
