

Non Profit Planning

Strategy Arts collaborative planning programs help boards, staff, and other stakeholders find the common ground essential for non profit success and provides support services to help them achieve it.

Vision • Alignment • Action **STRATEGY** *Arts*

“Clarity and inspiration are two results of our refreshing work with Strategy Arts. Through creativity and focused participation they provided our group with a clear road map for our future and helped build a cohesive team to get there”

- Judy Wicks, Owner & Founder
White Dog Cafe

Our Planning Approach:

Strategy Arts planning programs support non profit clients in developing a time based vision that best suits their mission and goals. Following our “Planning to Action Framework” we involve stakeholders from the start to ensure that all opinions are represented and that stakeholders find a common ground from which to build a shared vision of success. To help achieve the vision we provide a range of planning, research, and grant development services.

Our Team

The Strategy Arts non profit team offers a unique set of perspectives and real-world non profit experience, combined with a broad base of business understanding. Each of our consultants is trained in facilitation and group process. They contribute ideas, challenge thinking, and guide the planning process for the client leadership team within a collaborative environment.

Our Value

The ownership fostered by the way Strategy Arts integrates the analytical and human elements of management will take your organization from planning to action.

Our Planning Services

- **Vision Development and Planning**

We provide collaborative planning programs that support clients in developing a time based vision that best suits their mission and goals.

- **Budgetary Planning and Research**

We assist organizations to discover appropriate funding sources and help to develop short and long-term budgetary goals.

- **Grant Writing and Preparation**

We provide professional editing and writing services, as well as full project management to ensure that a quality product is submitted within the necessary time-frame.

- **Installation and Set-Up of Grant Management Systems**

We provide assistance in the selection and phase-in of appropriate software programs to help organizations better manage and plan their current and future grant holdings.
